

SECOND REGULAR SESSION
HOUSE COMMITTEE SUBSTITUTE FOR

House Concurrent Resolution No. 30

96TH GENERAL ASSEMBLY

4445H.03C

2 **WHEREAS**, over the course of the Spring and Summer of 2011, unprecedented releases
3 of water upstream by the U.S. Army Corps of Engineers have caused extensive pressure on the
4 river levees in the state of Missouri that protect many communities, businesses, and prime
5 agricultural lands; and

5

6 **WHEREAS**, in the face of this tremendous pressure some of Missouri's levees have been
7 intentionally and unintentionally breached, resulting in widespread flooding, which has proved
8 devastating to many Missouri homes, farms, families, and livelihoods; and

9

10 **WHEREAS**, last summer, the U.S. Army Corps of Engineers intentionally breached the
11 Birds Point levee in southeast Missouri which resulted in the flooding of 130,000 acres of mostly
12 agricultural land; and

13

14 **WHEREAS**, Missouri families have suffered unprecedented losses as a result of this
15 situation and many Missouri farmers have experienced a complete and total loss of agricultural
16 production, resulting in decimated farm incomes and ravaged local economies; and

17

18 **WHEREAS**, according to a June 2011 report drafted by the Food and Agriculture Policy
19 Research Institute of the University of Missouri, the breach of the levee and subsequent flooding
20 of crop lands in Southeast Missouri has resulted in economic losses totaling \$60.6 million, a
21 combination of forgone net returns and incurred production expenses in the affected area; and

22

23 **WHEREAS**, according to the University of Missouri Extension, the southeast Missouri
24 region produced the following shares of the state's total production of specific agricultural
25 commodities in 2010:

- 26 1) 100% of total cotton production in Missouri;
- 27 2) 99.6% of total rice production in Missouri;
- 28 3) 52.9% of total wheat production in Missouri;
- 29 4) 21.4% of total grain sorghum production in Missouri;

30 5) 18.1% of total soybean production in Missouri;

31 6) 15.4% of total corn production in Missouri; and

32

33 **WHEREAS**, with the agricultural production of southeast Missouri accounting for
34 approximately one-third of the state's total economy, the catastrophic results of the flooding of
35 agricultural land due to the intentional breach of the Birds Point levee in southeast Missouri has
36 a significant economic impact for the entire state. This complete and total loss of agricultural
37 production at a time when our state's economy is experiencing recession can only exacerbate the
38 state's current economic hardships; and

39

40 **WHEREAS**, the flood waters have not yet receded in some parts of Missouri and
41 continue to disrupt the lives of hard-working Missourians; and

42

43 **WHEREAS**, even after the flood waters recede, much work will need to be done to
44 restore the productivity of the damaged agricultural land and repair the ruined homes and
45 businesses; and

46

47 **WHEREAS**, the U.S. Army Corps of Engineers is charged with management of the
48 nation's rivers and flood control is one of the primary purposes for which the rivers are to be
49 managed; and

50

51 **WHEREAS**, the original flood plan was authorized in 1928 in response to severe
52 flooding of the Mississippi River in 1927. The U.S. Army Corps of Engineers is obligated to re-
53 examine the flood plan in light of the devastating losses, both short-term and long-term, suffered
54 in this state as a result of the unprecedented releases of water upstream and the intentional breach
55 of the Birds Point levee by the U.S. Army Corps of engineers during the Spring and Summer of
56 2011:

57

58 **NOW, THEREFORE, BE IT RESOLVED** that the members of the House of
59 Representatives of the Ninety-sixth General Assembly, Second Regular Session, the Senate
60 concurring therein, hereby strongly urge the U.S. Army Corps of Engineers to:

61 1) Re-examine the flood control operations for the Missouri and Mississippi rivers; and

62 2) Manage the rivers in such a way as to avoid the devastating flooding disasters that
63 have occurred this year; and

64 3) Rebuild the damaged levees to at least their previous heights as expediently as
65 possible; and

66

67 **BE IT FURTHER RESOLVED** that the members of the Missouri General Assembly
68 encourage communities, families and other stakeholders to work together to restore the prime
69 agricultural lands that have been damaged by the recent flooding so that the productive value of
70 these lands is not irrevocably lost; and

71

72 **BE IT FURTHER RESOLVED** that the members of the Missouri General Assembly
73 strongly encourage the members of the Missouri Congressional delegation to actively support
74 policies for the management of the Missouri River that minimize devastating flood events such
75 as those that have been experienced by so many Missourians this summer; and

76

77 **BE IT FURTHER RESOLVED** that the Chief Clerk of the Missouri House of
78 Representatives be instructed to prepare a properly inscribed copy of this resolution for the
79 Secretary of the U.S. Army and the members of the Missouri Congressional delegation.
